

MIA Corporate Responsibility and Sustainability Policy

MIA is a boutique property development and financial services company with interests in land and commercial property holdings, residential property development, property investments, asset management and financial services. Our group of companies are privately Australian owned and managed by a combination of professionals with experience in corporate advisory, taxation and finance, property development and construction.

MIA is committed to a more responsible and sustainable future by embracing “economic, social and environmental” targets into our business practices. Our goal is to deliver sustainable property investments to our clients through the development and management of emerging residential communities in Southeast Queensland.

MIA is unique in our approach to our service offering and we are committed to:

- Maintaining the highest possible standard of ethics and honesty in our business operations at all times,
- Delivering to our clients (investors and tenants), employees, suppliers and stakeholders a “business class” experience which exceeds expectations when compared to industry alternatives,
- Driving performance in the core elements of our business towards “building futures” including Workplace of Choice, Product and Investor Returns, Community Development and Management, and Environmental Impact,
- Developing and Managing residential communities which add value to the lives and wellbeing of our investors, residents and tenants, and blend as part of the overall economic, social and environmental characteristics of the supporting City Council and region,
- Putting in place risk mitigation strategies which prevent harm, loss or distress to our stakeholders,
- Pursuing continual improvement to enhance the sustainability of the property investment, asset management and residential property development sectors,
- Positioning MIA as a leader in it’s group’s industries and committees.

We encourage our people and stakeholders to actively participate in our drive for a more sustainable future and to uphold the principles chartered in this Policy.

Dwade Sheehan MBA (Laws)
Group Executive Director
